## Professional Summary

Kerri has a long history of working in the Vocational Education and Training (VET) and secondary schools sectors as well as the development of digital learning resources. As a qualified business and information technology teacher with a Bachelor of Education, she began developing digital learning resources for students to access in the late 1990s in the form of learning websites. This moved across to using “The Learning Place” and completing her first formal training in online learning in 2002, allowing her to cater for composite classes by creating self-paced resources for students to maximise their learning in a classroom setting with competing priorities. Fast forward to 2017-2018 and Kerri completed formal university studies at UNE, undertaking a Graduate Certificate in eLearning.

Kerri has a passion for ‘educating educators’ on how to engage learners, particularly in an online setting. She regularly runs professional development sessions on various digital learning tools and coaches teams of staff within RTOs in working towards their own in-house development of affordable digital learning resources.

Kerri understands VET from a strategic, compliance and operational perspective, previously being the Director of Content & Strategy for Velg Training, and currently, the Director of VETNexus and Digital Literacy Licence, is a member of the ASQA Stakeholder Liaison Group (SLG) and previously a Partner of The VET Gurus.
